

## Azacco NetCafe Client Installation

- Install Framework 2.0 to server computer from here:

<http://www.microsoft.com/downloads/details.aspx?FamilyID=0856each-4362-4b0d-8edd-aab15c5e04f5>

and VC++ redistributable package:

<http://www.microsoft.com/downloads/details.aspx?familyid=32BC1BEE-A3F9-4C13-9C99-220B62A191EE&displaylang=en>

- Make your Customer account and give to the account **administrator** rights. That is needed for build-in firewall.
- You have to give real IP to server if your client and Server are not in same network. Ex other is in NAT network.
- open port 14761 and 14762 for TCP/IP communication (if firewalled)
- Enable IGMP (Ping) for your internal network from your switch/router. Client will check using ping that the gateway is alive.
- Make safe customer windows account. Using third party program as:
  - Deskman - <http://www.anfibia-soft.com/downloads.htm>
  - More utilities - <http://www.softheap.com/security-tools.html>
    - No rights to registry
    - No rights to windows folders
    - No rights to restart or stop computer
    - Prohibit start from floppy, CD and USB. Accept only C drive.
    - Prohibit access to user directories

It is highly recommended to use utility that restore your computer state after restart as

Deep Freeze - <http://www.faronics.com/>

NetCafe Client automatically restarts customer computer after log off.

- Run installation file 'NetcafeClient.exe'
- When you are installing Netcafe Service install it 'just me'
- Add all information to opening applet. PayPal username have to be your account to which you want to get earnings.
- Restart Client computer.
- Please remember that money counters in program do not take notice shares and they

are **indicative**.
