Azacco NetCafe Server Installation

- Install Framework 2.0 to server computer from here:

  http://www.microsoft.com/downloads/details.aspx?FamilyID=0856eacb-4362-4b0d-8edd-aab15c5e04f5

  - Go to CentIPaid Merchant page form Help – CentIPaid Sign In or Properties – CentIPaid. Or here:
    http://www.centipaid.com/centi/signup/

    and buy a CentIPaid account. Individuals: CentIPaid **Personal Account**.
    Companies: CentIPaid **Business Account**.

    CentIPaid rates you can check from:
    http://www.centipaid.com/rates.html

    Azacco takes fixed 5.5% share

  - After that you get the Merchant ID.

  - Run installation file 'NetcafeServer.exe'
  - Double click 'NetcafeServer' icon and check properties.
  - In there you can set your Merchant ID.
  - You have to give real IP to server if your client and Server are not in same network. Ex other is in NAT network.
  - open port 14761 and 14762 for TCP/IP communication (if firewalled)
  - Enable IGMP (Ping) for your internal network from your switch/router. Server will check using ping that the gateway is alive.

- Please remember that money counters in program do not take notice shares and they are **indicative**.

- start Server: file – start or start button.
